Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 15-17, drawn to a mapping catheter.

Group II, claim(s) 18-38, drawn to an endocardial mapping catheter assembly.

Group III, claim(s) 39-43, drawn to an endocardial chamber mapping system.

Group IV, claim(s) 44, drawn to a method of constructing a mapping catheter.

Group V, claim(s) 45, drawn to a method of associating a connection in a plug.

Group VI, claim(s) 46-49, drawn to a method of locating a catheter.

Group VII, claim(s) 50, drawn to a method of mapping.

Group VII, claim(s) 51, drawn to software operating on a computer.

The inventions listed as Groups I-VII do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: they relate to various structural aspects of the catheter and system which do not require corresponding features as well as methods which are not specially adapted to one particular category of invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
